Al-Fateh Engineering Works

- Implemented multi-language support, CRUD, multi-file upload, and an admin dashboard. Integrated CKEditor and branch location maps.

Technologies: Laravel, Blade, JavaScript, HTML, CSS, CKEditor, Google Maps API

links: Github link ⇗ , Website link ⇗

Trello Clone

- Designed a relational database with many-to-many relationships. Developed card features (labels, comments, due dates) and tracked actions using complex queries.

links: Github link ⇗ , Website link ⇗ , API collection link ⇗

Abaya System

- Built a multi-store platform with role-based permissions and batch generation for Excel uploads, managing product sizes and quantities.

Technologies: Laravel, Blade, JavaScript, HTML, CSS, Bootstrap.

links: Github link ⇗ , Website link ⇗

Autism&Me

- Designed the database and developed multi-language CRUD operations with full content control from the dashboard.

Technologies: Laravel, Blade, JavaScript, HTML, CSS, CKEditor

links: Github link ⇗ , Website link ⇗

Medical
- Customized Blade pages, created Pusher chat groups, and implemented user ID verification. Added multi-language support and chat message deletion jobs.

Technologies: Laravel, Blade, JavaScript, HTML, CSS, Pusher

links: Github link ⌗ , Webiste link ⌗

E-commerce (multi-vendor store)
- Developed CRUD, repository Pattern, multi-authentication, and shopping cart system with localization, Fortify authentication, and currency converter API.

Technologies: HTML, Bootstrap, Ajax, Php, Laravel.

links: Github link ⌗ , API collection link ⌗

School Management Program
- Built multi-authenticated dashboards with file management, live validation, and fee processing. Integrated attendance and calendar systems.

Technologies: HTML, Bootstrap, Ajax, Livewire, Php, Laravel.

links: Github link ⌗
Invoice Collection System
- Developed a dashboard with Excel export, PDF printing, email notifications, and CRUD with admin permission control.

Technologies: HTML, Bootstrap, Ajax, Php, Laravel.

links: Githublink ⌗

SallaPlus
- Designed the database and admin dashboard. Added cart submission via WhatsApp and integrated social media management.

links: Github link ⌗ , Collection link ⌗

Muslim To-Do List
- Developed an admin dashboard with multi-authentication, daily task tracking, and notes system with resource collections.

links: Github link ⌗ , Collection link ⌗ , Website link ⌗

Chat
- Implemented one-to-one, group, and global chat using Pusher for real-time messaging.

Technologies: Laravel, Blade, JavaScript, HTML, CSS, Pusher

links: Github link ⌗

Property-Invest
- Developed login, register, and forget password functionalities, Implemented multi-guard authentication for admin and user.

Technologies: Laravel, Blade, JavaScript, HTML, CSS.

links: Github link ⌗

Strong Cars
- Contributed to designing the database.
- Implemented multi-language support, used Laravel Sanctum for login, register, and logout functionalities.

links: Github link ⌗ , Collection link ⌗

Livewire & Ajax Crud
- Contains CRUD once by Livewire and once by Ajax with infinite load.
